## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 1-23 are currently under examination, wherein claims 1, 5 and 6 have been amended in applicant's amendment filed on April 2, 2008.

### ***Status of Previous Rejections***

2. The previous rejections of claims 1-23 as stated in the Office action dated November 2, 2007 have been maintained.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hatch et al. (US 4,410,498) in view of Lussiez et al. (US 4,547,348) as stated in the Office action dated November 2, 2007.

With respect to the amended features in the instant claims 1, 5 and 6, Hatch et al. (498) discloses a improved process for recovering nickel and cobalt from lateritic ores comprising processing the leach liquor obtained by processing the ore by atmospheric and/or pressure leaching as claimed (abstract and Fig. 2). Therefore, the reasons for the rejections of these claims as stated in the Office action dated November 2, 2007 are further applied properly herein.

### ***Response to Arguments***

Art Unit: 1793

4. Applicant's arguments filed on April 2, 2008 have been considered but are not persuasive.

The applicant argues that Hatch et al. ('498) teaches a process to form a leach liquor and the use of "conventional liquid-solid separation method" to form liquor that is further treated by "conventional metal recovery processes to win the nickel and cobalt contained therein" (col. 5, lines 30-34). In response, the examiner notes that Hatch et al. (498) discloses a improved process for recovering nickel and cobalt from lateritic ores contaminated with iron by adding to the leaching solution a reducing agent to maintain the redox potential of the solution at a desired level (abstract). The process of Hatch et al. ('498) comprising introducing the reducing gas into the solution, neutralizing the solution and precipitating nickel and cobalt in the solution is a continuous and dynamic process (col. 2, line 67 to col. 3, line 35). During the leaching period, the leaching solution of Hatch et al. ('498) is a leach liquor containing nickel and cobalt (col. 3, line 44 to col. 4, line 6). Therefore, the teaching of Hatch et al. ('498) does include processing the leach liquor as claimed. The combination of Hatch et al. ('498) and Lussiez et al. ('348) with a proper motivation as stated in the Office action dated November 2, 2007 renders the claim limitations obvious to one of ordinary skill in the art. Hatch et al. ('498) does not teach how to recover nickel and cobalt from the leach liquor, because these techniques are well-known in the art.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1793

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
